Assignment-03 DBT

1) Does ANSI recognize the data type DATE?

Ans: Yes, ANSI SQL recognizes the DATE data type. It is used to store date values in the format YYYY-MM-DD. Most SQL databases that follow ANSI standards support DATE, along with other date-related data types like TIME and TIMESTAMP.

2) Which subdivision of SQL is used to insert values in tables?

Ans: The Data Manipulation Language (DML) subdivision of SQL is used to insert values into tables.
